Date: 26/06/26 Version: 04	OMNICANE ETHANOL PRODUCTION LIMITED BONSUCRO CHAIN OF CUSTODY POLICY	omnicane Integrating Energies

Omnicane Ethanol Production Ltd operates a bio-ethanol distillery at La Baraque and a bio-ethanol storage facility in the Port Area at Mer Rouge, Port Louis as Omnicane Bioethanol Operations Limited. The main purpose of Omnicane Ethanol Production Ltd is to produce sustainable bioethanol using sugarcane molasses. The two by-products from the manufacturing process are carbon dioxide and Concentrated Molasses Stillage. The carbon dioxide is used in the beverage industry, while the Concentrated Molasses Stillage is used as bio-fertilizer.

We recognize increasing consumer demand worldwide for sustainable renewable sources of energy, bio-ethanol being one of them. In this context, and in line with Omnicane's sustainability engagement, we have taken the firm commitment to carry out our operations in a sustainable manner.

Omnicane Ethanol Production Ltd & Omnicane Bioethanol Operations Limited are fully committed to engage with their supply chain to abide by the 'Bonsucro Chain of Custody standard. Hence, Omnicane Ethanol Production Ltd is fully committed to produce sustainable bio-ethanol from sugarcane molasses, received from economic operators having a valid Bonsucro chain-of-custody certificate and production certificate.

As the unit of certification, we shall ensure continual improvement of this system by conducting internal audits at planned intervals and management review at least yearly. We shall also communicate this policy to our suppliers and other relevant stakeholders.
